

DUAL DOZER

Designed for the modern day contractor working against time clocks and tight budgets. Dual Dozer reduces labor and material costs while improving the overall quality of site preparation.

Standard Features:

- **Rear Positioned Casters** – Compact design lets you get into corners, up against structures, and around pillars with ease while also improving travel and stability on graded surfaces
- **Dual-Sided Cutting Edge** – Front and rear cutting edges allow you to push or pull material for precise placement while traveling in either direction
- **Highly Maneuverable** – Blade attachment can self-articulate up to 8 inches independently of the skid steer on either side
- **User-Friendly Controls** – In-cab monitors and fingertip switches allow for easy operation in auto or manual modes
- **Industry Leading Technology** – Complete your final grade guided by laser receivers, slope and sonic tracers, GPS, or 3D mapping
- **Reduce Time & Materials** – Studies estimate a 10% material savings when using an automated grade control
- **Overbuilt to Outlast** – HitchDoc has more than 20 years of experience manufacturing rugged-finish graders and inspecting them against the highest quality standards
- **Quick-Tach or 3-Point Mounts** – Select the mount that best fits your needs: standard quick-tach plate for easy mounting to skid steers, or an easy-attaching three-point mount
- **Long-Lasting Powder Coating** – Our custom finish holds up against the toughest elements on the job site
- **Hydraulic Control** – Connectors, cylinders, hoses, valves, and solenoids are standard equipment—just plug in the selected electronics and get to work
- **Cutting Edges** – Bolt-on, half-inch thick, hardened steel front and rear cutting edges are removable and replaceable, while the side edges are adjustable to the desired cut depth
- **Certified American Steel** – Heavy-duty construction features 7 gauge, 1/4", 3/8", and 1/2" steel reinforced with 2" x 4" tubing for an extremely durable and long-lasting frame
- **Continual Improvement** – Year after year we put our products to the test on real job sites, pushing them to the breaking point to maintain the high-level dependability you've come to expect from HitchDoc
