

FUEL POD

Optional:
DEF Tank Assembly &
Heavy-Duty Battery

INDUSTRY FIRST & PATENT PENDING

Fits seed box tenders, standard truck beds and any size trailer for maximum fuel transportation flexibility!

Standard Features:

- **Trucks, Trailers or Tenders** – Easily and safely haul fuel to the field, course or job site with ease as it fits trucks, trailers and box style seed tenders
- **Durable Storage Compartment** – The easy access storage compartment houses the pump, hose, filter and optional DEF system which seals tightly and is lockable for an added level of fuel safety
- **Multiple Lifting Options** – For extreme mobility, effortlessly lift with dual skid pockets on all sides and easily place in the desired location
- **Easy Operations** – Pairing an external on/off switch with a straightforward sight fuel level gauge, any operator can quickly fuel up before getting back to work

- **Hose Position Variations** – Quickly hang the hose off the protected, external hook between quick fills or wrap it up in the storage compartment for transport and longer term storage
- **Toughest Powder-Coat Finish** – Cleaned and coated steel then baked to 400° for one of the most durable and robust powder-coat finishes available to withstand the harshest environments
- **Overbuilt to Outlast** – With years of hard use and miles in mind, HitchDoc used 14-gauge American Steel with double welded seams and inspected against the highest quality standards
