

# HFT9900 FUEL TRAILER

**BRING FUEL TO YOUR EQUIPMENT,  
NOT YOUR EQUIPMENT TO FUEL**

## Standard Features

- **Efficiency & Profitability:** The HFT9900 is equipped with high-quality pumps and built with a durable construction to be dependable year after year so you can bring fuel to your equipment, not the other way around.
- **Rear Platform:** Make every trip count. Our rear work platform provides easy access to the tank as well as room to haul a utility box, air compressor, generator, or other ancillary equipment.
- **DOT Compliant:** With electric brakes, tail lights, running lights, and safety markings this fuel trailer can be driven off the lot and straight to work.
- **Independent Features:** Fenders and tanks are independent and bolted on the trailer frame, creating the ability to change sizes or add features as an operation grows.
- **Rubber Torsion Axles:** Our suspension minimizes road bounce while travelling full or empty, protecting our investment from unnecessary fatigue.
- **Long-lasting Finish:** Baked at 400° and thoroughly inspected, our finish is up to withstand harsh conditions. Custom color options are available.
- **Overbuilt to Outlast:** Double welded, American steel constructions that's inspected against high quality standards ensures the HFT9900 will keep your machinery fleet running for years.
- **Full-Width Baffles:** Each tank has dual baffles running the complete width of the tank to minimize fuel sloshing and improve the trailer ride across rough terrain.
